**The Caterpillars are Coming!**  
**26<sup>th</sup> Annual Butterfly Season at KidSPACE Children's Museum**  
*A special celebration of the Monarch Butterfly, taking flight March 11*

**PASADENA, CA** The Western monarch butterflies are returning to Southern California, and that's cause for celebration at KidSPACE's annual Butterfly Season, running March 11 through May 31.

Only one year ago, researchers sounded alarms about the vanishing monarch after recording a record low population of wintering butterflies in California. This year, scientists report that the monarch is poised for a comeback, and KidSPACE is celebrating with hands-on art and science activities for budding naturalists.

"Children have an affinity for nature and wild creatures, and our Butterfly Season invites them to get up close, learn, and actively support threatened butterflies and other pollinators that live in our neighborhoods," said KidSPACE CEO Lisa Clements. "This year we're focusing on butterfly life cycle and habitat so that families can participate in supporting migratory species like the Monarch. We've joined forces with the University of Kansas to create a Monarch Waystation at the museum where visitors can learn how to spot, count, and record eggs and caterpillars, which is something they can continue to do at home."

Butterfly Season highlights include:

- **Pollinator takeover in Nature Exchange.** View live butterflies and honeybees, learn about the butterfly life cycle, and celebrate the role of pollinators in a healthy ecosystem.
- **Bug safaris.** Kidspace will provide the magnifying glass and some expert tips; you bring your curiosity and keen creature-spotting skills and join in our search for eggs, caterpillars, and adult insects around campus.
- **Create a caterpillar.** What kind of fuzzy caterpillar would you like to create? Shape your creature out of clay, and then add seeds to sprout a fuzzy fellow of your own to take home.
- **Flower showers.** You can support pollinators such as butterflies by growing plants that attract and feed them. Grab a watering can and learn about what plants butterflies and other pollinators rely on while helping the flowers grow.
- **Fantasy flutter-by play.** Dress up like a butterfly, sit in a "chrysalis," and take your picture with a beautiful set of monarch wings.
- **Live caterpillar adoptions.** They're back! A living science project the whole family (or classroom) will enjoy; raising and releasing native Painted Lady butterflies. The whole process takes about two weeks from tiny caterpillar through metamorphosis to lovely butterfly, ready to release into nature. Caterpillar adoptions are available onsite through the Kidspace store or online at [store.kidspacemuseum.org](http://store.kidspacemuseum.org). All caterpillars must be picked up in person at the museum. Caterpillars start at just \$6 for one, and care instructions are available online.

In addition to celebrating butterflies and pollinators during Butterfly Season, families can enjoy their favorite Kidspace features including playing in the Interpretive Arroyo Stream and water features, navigating the Ant Tunnel, exploring what's over the rainbow at the top of our Raindrop Climber, and getting hands-on with science in our Physics Forest.

Visit [kidspacemuseum.org](http://kidspacemuseum.org) to reserve tickets for Butterfly Season, included at no additional charge in museum general admission. For the latest announcements and updates, follow Kidspace Children's Museum on Instagram, Facebook, and Twitter.

## ABOUT KIDSPACE CHILDREN'S MUSEUM

Kidspace Children's Museum is a 501(c)(3) nonprofit educational and cultural institution committed to serving the needs and interests of children and families. Kidspace hosts nearly 380,000 guests each year on a beautiful, 3.5-acre outdoor campus with more than 40 hands-on exhibits, a live animal collection, and a variety of creative play spaces

and water features. Kidspace offers a wide array of free and discounted programs, field trips, and digital resources for schools to maximize access for children and educators.

Protecting the safety of our visitors and staff is important to Kidspace. In order to allow for social distancing, availability of indoor spaces is subject to capacity.
